

ADAM WENTWORTH

Burnaby, British Columbia | 604-726-7888 | adamjohnwentworth@gmail.com |  
BSc Applied Computer Science (BCIT) | May 2027 | Internship Candidate (Summer 2026)

SKILLS

Languages: Python, TypeScript, JavaScript, Go, C++
Frameworks: React, Node/Express, FastAPI, Fiber
Databases: PostgreSQL/PostGIS, MySQL, MongoDB
Tools: Git, Docker, NGINX, Kafka, GitHub Actions
Fundamentals: Data Structures, Algorithms, OOP, Networking, OS, Testing, Agile/Scrum

PROJECTS

Pokemon Go Nexus – Full-Stack Developer   *React, Go, Kafka, MySQL, Postgres/PostGIS, Node, MongoDB* September 2023 - Present
Event-driven platform for Pokémon GO players with microservice boundaries.

- Built Kafka-backed Go services (producer/consumer) with MySQL and streamed live updates to frontend clients via SSE.
- Implemented auth service in Node/Express with JWT access/refresh tokens stored in secure cookies, backed by MongoDB.
- Added geospatial search in Postgres/PostGIS using spatial indexes and polygon queries.
- Containerized with Docker + NGINX reverse proxy, rate limiting/security headers and frontend tests (Vitest).
- Implemented automated Database backups with a grandfather-father-son retention policy and restore-ready artifacts.

Pokemon Autochess – Systems Developer  *C++20, SDL2, OpenGL, Lua (sol2)* April 2025 - Present
Built a custom engine + game layer with deterministic combat/movement for an autobattler.

- Designed an engine/game boundary (GameLoop + GameContext) to decouple gameplay from SDL and avoid global singletons.
- Implemented deterministic movement in Lua (A*, priority, reservations, swap prevention) for reproducible simulations.
- Created a data-driven Lua rules layer via sol2 with modular systems to iterate without recompiling C++.

Jarvin – Software Engineer  *Python, FastAPI, llama.cpp, asyncio, pytest, GitHub Actions,* September 2025 - December 2025
Fully local offline voice assistant (Audio-Speech-Recognition → local LLM → TTS) with a focus on robustness and observability

- Integrated Whisper-based speech-to-text with a local GGUF LLM runtime via llama.cpp for offline chat responses.
- Implemented real-time audio capture with adaptive noise-gate Voice-Activity-Detection to detect utterances reliably despite background noise.
- Auto-provisioned and loaded the local LLM at startup; shipped a Gradio UI mounted in FastAPI for control/observability and testing/CI support.

Innota – Full-Stack Developer  *MERN, Docker* September 2023 - December 2023
Shipped production features for a student team building a PDF-based study workspace with AI writing tools.

- Refactored and shipped React UI + REST APIs through peer review and iterative client requirements.
- Implemented PDF upload/ingestion and in-app AI actions (summarize/paraphrase/bullets/translate/elaborate) via OpenAI API.
- Containerized the app with Docker and supported production deployment and handoff.

EDUCATION

British Columbia Institute of Technology (BCIT)
BSc - Applied Computer Science September 2025 - Expected May 2027
Diploma - Computer Information Technology September 2022 - May 2024

SAE Institute
Diploma in Audio Engineering & Music Production October 2019 - June 2020

EXPERIENCE

IT Support Specialist – Internship May 2023 - August 2023

Firefly Systems IT Support - Vancouver, BC, Canada

- Provided end-to-end IT support for on-site and remote users, troubleshooting hardware, operating systems (Windows, macOS, Linux), networking, cloud services, and security issues across desktop and mobile environments.
- Administered user access and IT infrastructure across Active Directory, VPNs, routers/switches, Office 365, and Google Workspace, maintaining backups, asset inventory, and helpdesk ticket workflows.

Operations & Data Coordinator August 2020 - February 2023

Reliant Music - Vancouver, BC, Canada 

- Rebuilt a disorganized song-management catalog into a standardized, royalty-claim-ready dataset by defining spreadsheet schemas/conventions and running validation/QA checks for accuracy and consistent formatting.
- Designed and maintained a DJ research database tracking social metrics, contact info, and status to support targeted topline placements.

ADDITIONAL EXPERIENCE

Recording Engineer – Hippo sonic Studios 

Client-facing studio work and technical troubleshooting.

CaptainMonkHD – YouTube Content Creator – 200k+ subscribers, Riot Games Partner 

Analytics-driven content production, consistent delivery, managed brand partnerships.
